Ashutosh Gautam **+91 7566282475 |ashugoutam007@gmail.com | Linkedin | GitHub |**

Technology professional with 2+ year of experience in analytics, software development, and technical education. Strong analytical and problem-solving abilities with hands-on experience in developing data-driven solutions, building projects, and mentoring students in industry-oriented learning.

Skills

Advanced Excel	Pivot Table, Charts, Lookups, Power Query, Power Pivot, Macros, and VBA
Programming	HTML, CSS, C language, Python, SQL, etc.
Power BI	Power Query, Data Modelling, DAX, Extract, Transform & Load (ETL), Data Transformation, Data Reporting
Python	Numpy, Pandas, Scikit Learn, Machine learning

Experience

May 2026 – Present

Parul University – *Assistant Professor*

- Contributed to the AI & ML Club and Advanced Learner & Slow Learner (ALSL) Committee, organizing technical activities, mentoring students, preparing performance reports.

May 2025 – Apr 2026

Marwadi University (Partnered With Arrivo Edu tech pvt. Limited) – *Assistant Professor*

- Trained 200+ undergraduate and postgraduate students in programming languages along with data analysis tools including Power BI, Excel, and Machine Learning, etc. through hands-on practical sessions.
- Mentored and guided students in developing academic and industry-oriented projects, providing support throughout project planning, implementation, documentation, and presentations.
- Prepared and maintained NAAC and UGC-compliant academic documentation, including course files, lesson plans, assessment records, and accreditation-related reports, ensuring adherence to institutional quality standards.

Jun 2024 - April 2025

AnytchPros Infotech LLP – *Jr. Software developer*

- Developed proficiency in Python through an immersive learning experience, completing over 50 hours of hands-on coding.
- Developed interactive Tableau and Power BI dashboards for data visualization, KPI tracking, and business reporting.
- Created a Profit & Loss (P&L) statement in Excel to analyze revenue, expenses, and profitability, enabling better financial decision-making.

Projects

Used Car price prediction – *[Machine Learning/Python]* | ***GitHub Repo*** | ***LinkedIn Post*** | ***Live Project***

- Built an end-to-end Machine Learning application using Python, Scikit-learn, and Streamlit, strengthening skills in regression modeling and model deployment.
- Applied data preprocessing, feature engineering, and model evaluation techniques to develop a predictive Machine Learning solution.

BI 360 Project – *[Power BI / SQL]* | ***GitHub Repo*** | ***LinkedIn Post*** |

- Designed and deployed business-specific Power BI dashboards (Sales, Marketing, Executive, and Logistics) by integrating SQL and Excel data, delivering comprehensive insights into organizational performance.
- Applied data modeling and created 20+ DAX measures and KPI visualizations to monitor sales, profit, gross margin, and customer performance, delivering interactive business intelligence dashboards.

Consumer Goods Ad Hoc Insights – *[Excel]* | ***GitHub Repo*** | ***LinkedIn Post*** |

- Analyzed customer and market performance using Excel, identifying 304.5% sales growth ($87.5M to $598.9M) across FY2019–FY2021 and evaluating YoY revenue trends for key customers.
- Analyzed customer and market performance data in Excel using Pivot Tables, Power Query, and advanced formulas, identifying 304.5% sales growth ($87.5M to $598.9M) and generating actionable business insights.
- Applied data cleaning, data validation, trend analysis, and KPI reporting techniques to compare market performance against targets, identifying a 9.2% global target gap and supporting data-driven decision-making.

Certifications and Awards

- Codebasics Data Analytics Certifications – **Excel | Power BI | SQL | Python**
- Machine Learning and Data Science Certificate by Ekeeda

Education

Jun 2022 - Jul 2024

Vindhya Institute of Technology and Science, **Satna** – *Master of Computer Applications (MCA)*

- **Relevant Coursework:** Data Structures, DBMS, Python Programming, Data Mining, Data Analytics, Machine Learning, Artificial Intelligence, Software Engineering, Operating Systems, Cloud Computing, and Computer Networks, etc.
- **Academic Exposure:** Strengthened analytical, programming, and problem-solving skills through coursework, practical labs, and capstone projects focused on data analysis, business intelligence, and machine learning applications.
